If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

### **DETAILED ACTION**

This Examiner's Reasons for Allowance action is in response to the filing of 07/23/2009.

#### ***Allowance***

1. Claims 1, 4, 10, 12-16, 21, 22, 27, & 28 have been cancelled.
2. Claims 2, 3, 5-9, 11, 17-20, 23-26, & 29 have been amended which overcome the examiner's prior rejections and objections, see paper of 04/13/09, as indicated in the Advisory Action of 06/26/2009. Examiner withdraws all outstanding rejections and objections to claims 2, 3, 5-9, 11, 17-20, 23-26, & 29.
3. Claims 2, 3, 5-9, 11, 17-20, 23-26, & 29 are allowed.

#### ***Examiner's Statement of Reasons for Allowance***

4. Prior art was found which disclosed secure compressed imaging [e.g. Davis (US-5907619-A)] and how to sign digital streams [e.g. Gennaro et al. (US-6009176-A)] and generating video in a computer system (interlaced/noninterlaced even odd frame field portion) [e.g. Baker et al. (US-5790110-A)] and interlaced to non-interlaced scan converter with reduced buffer memory (interlaced noninterlaced horizontal lines even odd frame field well known) [e.g. Kwon (US-5373323-A)] and embedding a watermark into a digital image or image sequence (watermark, spread spectrum, embed) [e.g. Isnardi et al. (US-6037984-A)].

5. Claims 2, 3, 5-9, 11, 17-20, 23-26, & 29 have also been previously indicated as allowable if the remaining non-allowable claims were to be cancelled, would place the applicants' claims into condition for allowance, which they have done.

6. The following is an examiner's statement of reasons for allowance:

- The prior art of record does not teach or render obvious the limitations as recited in independent Claims 23 & 29, specific to, "a memory connected with the input for sequentially storing each of the at least first and second frame portions of each of the frames of said audio-visual signal, thereby allowing for a reduced memory requirement relative to storing an entire frame of said audio-visual signal" and "a processor programmed to perform the steps of: calculating a signature based on a first portion of said frame of said audio-visual signal currently stored in the memory" and "embedding the signature calculated based on the first frame portion in the second frame portion stored in the memory subsequently to the first frame portion such that the signature is embedded in a different portion of the frame than a portion of the frame from which it is calculated" and "while the second frame portion is stored in said memory, calculating a signature based on the second frame portion for embedding in a subsequent frame portion to be stored in the memory subsequent to the second frame portion" and "loading a first frame portion of a frame of said audio-visual signal in a buffer memory, thereby allowing for a reduced memory requirement relative to storing an entire frame of said audio-visual signal" and "calculating a signature based on an image property including at least one of DC value, edges, or moments and based on the first frame portion of said frame of said audio-visual signal" and "loading a second frame portion of the frame replacing the first

frame portion in the buffer memory, the reduced memory requirement being equal in size to a larger of the first frame portion or the second frame portion” and “embedding the signature in the second frame portion of the frame such that the signature is embedded in a different portion of the frame than a portion of the frame from which the signature is calculated”;

- Dependent claims are allowed as they depend from an allowable independent claim.
- Therefore, the Examiner considers the above limitations in combination with the remaining limitations found in each respective independent claim, as applied to embedded signatures in a signal which comprises audio & video content, as the non-obvious novelties of the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance”.
